Hanging Instructions for Large Boards Using L-Bracket Support

Instructions:

1. Read and understand instructions before installing board.
2. Hang board by corner brackets (attached to board) using wall anchors and screws provided.
3. Draw line along the bottom of the board. This will be the guide for attaching the L-brackets.
4. Remove board from wall.
5. Attach L-brackets to wall, making sure the brackets are on the guideline in the full down position. If the board is to be mounted to a "stud" wall, it is best to mount the brackets directly into studs. On walls other than stud walls, place one clip 6" from each end of the board and evenly space the others in between, using the screw anchors provided.
6. Place board back onto wall using the L-brackets for support.
7. There is a screw hole in the short leg of each L-bracket. Hold the board firmly to wall and mark the frame at each screw hole. Drill 1/16" holes into the frame, and screw self-tapping screws through L-brackets into the frame to hold board into place.
