## Off-the-Leg Chalktray Assembly

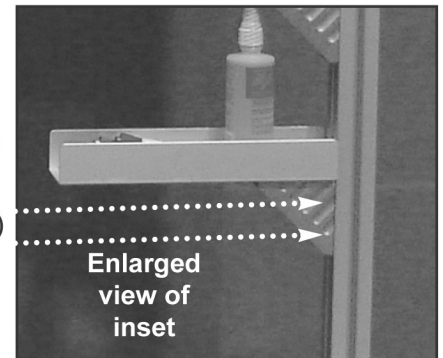

### Parts Supplied:

- 1 Short Chalktray Assembly
- 1 Angle Bracket
- 2 T-Bolts and Nuts

### Tool Required:

- 13mm Box or Socket Wrench ④

Right side of Standing Board shown (can also be attached to left side)

### Instructions:

1. Face the front of the standing board.
2. Position chalktray assembly at desired height on inside of leg frame.
3. Insert two T-Bolts through holes in Angle Bracket and into leg frame slot. Make sure nut is flush with end of bolt. Tightening nut will rotate T-Bolt 1/4 turn locking it into proper position for assembly. (Line on end of T-Bolt is perpendicular to slot when in proper position.)
4. Using your 13mm wrench, tighten each nut until resistance is felt, then tighten about 1/3 turn to secure in place.
