## **Wood Cabinet Projection Screen Installation**

## Instructions:

- 1. Remove plywood facia at head of the cabinet by taking out truss head screws.
- 2. Install the pull-down projection screen in the screen brackets (factory installed) located at each end inside the head housing.\*
- 3. Replace the plywood facia by reversing the procedure in step #1. Screen is ready for use.
- \* NOTE: If your cabinet requires a 40"x60" model projection screen, it will be necessary to move the brackets to the outer predrilled holes. After you have secured brackets, proceed with step #2.
